

# **Rainbow by Alcatel-Lucent Enterprise Quick Start Guide**

## for Android\*

## The main features of the <u>Rainbow by Alcatel-Lucent Enterprise</u><sup>™</sup> application for Android include:

#### Telephony

- GSM mode or softphone mode (VoIP calls)
- Automatic availability detector (for example; engaged, available)
- Professional voicemail notification
- Call management: Re-dial, transfer, three-way conference, call forwarding to professional voicemail or a separate line
- Search your company directory and personal contact list
- Detailed call history

#### Collaboration

- Contact management
- Instant messaging and automatic presence identifier
- Audio/video call with other users
- Bubbles (groups) with users both within and outside your organization (including chat, file sharing)
- Video-web conferencing with up to 120 internal or external participants (voice, video, screen sharing), with 6 simultaneous video streams
- Phone conferencing with up to 100 participants (screen sharing available)
- Access to internal or external updates through the Channel feature. Include both text and multimedia (links, images, files, videos)
- Personal cloud file storage up to 20GB
- GPS location sharing (Google Maps)

## Discover your mobile collaboration solution

### Manage incoming calls efficiently

## Make business calls

## **Bubbles and Web conference**

- Create and operate bubbles (working groups) with both internal and external guests
- At any time, you can launch a video-web conference with all the participants in a bubble
- Switch between front and back camera
- Web conferencing makes it easy to mix voice, video and screen sharing for all participants
- Participants can join a conference via their web browser, mobile device, Rainbow client (Windows or Mac), or through our Rainbow Room solution
- Enlarge the picture of any participant
- Have any participant share their screen
