

# MobiBBox – The compact Unified Event Communication Platform

When incidents or critical situations requiring a prompt reaction of the responsible parties occur, such as fire alarm, emergency calls, crisis management, personal security or information technology faults, the use of an alarm platform is of very high importance. With MobiBBox, New Voice offers a compact alarm system.

A great added value of the “Plug & use” solution is the wide range of integrations possible. In addition to a multitude of interfaces connected to different communication platforms, also fire alarm systems, nurse call systems,

building management system platforms, potential-free contacts and ICT components can be connected.

The system provides an information distribution based on time and calendar, which flexibly illustrates on-call duty plans and duty rosters. Depending on the alarm configuration, the information transmission can occur on a skill or priority basis and in a simultaneous or sequential way. MobiCall also supports internal watchdog monitoring, automatic backups, and comprehensive reporting and statistics functions.

The MobiBBox Gateway distributes alarm notification via text and/or voice message to wireline and mobile end devices, such as DECT, Wi-Fi and GSM, including acknowledgement and escalation options.

### Overview of the key aspects:

- compact industrial PC
- easy handling
- no moving parts
- low maintenance requirements
- MobiCall is pre-installed
- support and configuration through remote maintenance at any time
- embedded operating system
- web server integrated
- connection of DECT devices
- visual alarms, door camera solution
- 3G/4G server (iOS, Android, BlackBerry)
- PC Client for Pop-Up notifications

### Fields of application:

Mobilization & Evacuation

Alerting & Emergency calls

Lone worker protection & Localization

Nurse call system integration

Monitoring of technical components

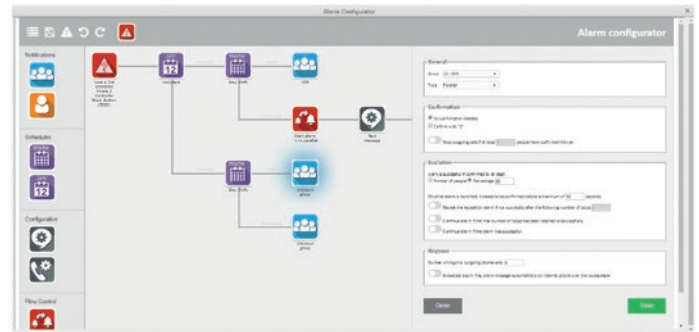

IoT-based Monitoring & alerting

IT Monitoring

Connection to the fire alarm system

## Pre-installed & ready to use

The MobiBBBox is based on industrial hardware and a high-performance embedded operating system. The MobiCall Application is already pre-installed. This user-friendly concept significantly reduces the cost and time required for installation and initial operation. The web-based management tool has an innovative “drag & drop” configuration tool.

## Technical Details

Performance	Amount
Voice channels	30
Interfaces	3
Contacts/Relay outputs	128
Alarm groups	90
Message link	100
Phone alarm inputs	100
PC & smartphone clients	100
Alarm scenarios	1,000

Processor	Intel® Core i3-5010U 2 x 2,1 GH 64 Bit
Computer memory	8192 MB SO-DDR3 LP RA
Hard disk	120 GB 2,5 SATA II SSD
Dimensions in mm	200 width x 55 height x 150 depth
Weight	approx. 2.0 kg
Power consumption	Standby: approx. 1 W, idle running: approx. 20 W, full load: approx. 30 W
Connection to the mains	External supply units 220V // 12V / 3A
Ventilation system	Passive cooling
Assembly	Wall mounting with optional 19" installation kit
Ports	4 x COM, 2 x USB 2.0, 2 x Audio, 2 x USB 2.0, 2 x USB 3.0, 2 x Intel Gigabit LAN, 1 x VGA, 1 x HDMI, 1 x DIO

## New Voice International AG

The Swiss company New Voice International AG has been developing high-quality solutions in the security, telecommunication and information technology fields since 1991. With more than 6,000 globally successfully implemented systems, New Voice is the leading provider in the field of Unified Event Communication.

More than 60 employees around the world are collaborating in the development, sales, project management, installation and support departments in order to create reliable and innovative products combined with user-friendly interfaces.
